

ANTI-FATIGUE MATTING

Standing for long periods of time is particularly stressful and fatiguing. Regardless of the quality of shoes and quality of the floor covering, standing can cause tiredness after an entire working day. Anti-fatigue mats can reduce fatigue and potential muscular skeletal conditions over long periods of time. When considering the use of anti-fatigue mats, there are several factors that should be considered at the same time, such as allowing changes in working/standing position, footwear, and flooring. Let our expert staff assist you in choosing the right anti-fatigue mat for your workplace to assist you in reducing muscular skeletal injuries and conditions.

Our focus to be environmentally conscious and responsible results in all of our products having a re-cycled component and some of our products are 100 % re-cycled material.

Our Matting Products Include:

- Entrance Mats
- Static dissipative Mats. (Safe for use in computer rooms and electrical part manufacturing areas).
- Certified Textured Slip-Resistant Mats by the National Floor Safety Institute
- Mats that minimize movement and maximize safety as well as low profile, beveled borders.
- Safety Mats (identified information on mat as well as OSHA safety colors)
- Welding Safe Mats
- Walkway Mats for all areas including roof tops.
- Pool Mats
